

DIDIK ISMAWANTO

Mobile Developer

Kediri, Indonesia | +6281226839119 | ismawantodidik@gmail.com | didikk.github.io

SUMMARY

Mobile Developer with 10+ years of experience delivering production-ready apps using React Native, Android Native, and Flutter. Skilled in TypeScript, Kotlin, Clean Architecture, and scalable app patterns. Strong in performance optimization, app stability, CI/CD, and feature modularization. Known for improving codebases, executing migrations, and building reliable mobile products used by thousands of users.

EXPERIENCE

FARMBYTE SDN BHD – Remote

Mobile Developer (React Native) | May 2025 – Sep 2025

- Assisted the migration from the legacy Android Native app to the new React Native version, contributing features that supported a smooth user transition and reduced friction during rollout.
- Developed and maintained the FarmByte Grow App using React Native and TypeScript, improving UI responsiveness and increasing overall app stability.
- Contributed to the internal shared UI package, creating reusable components that streamlined development and improved consistency across teams.
- Built key modules for the Seller Center App, enabling seller onboarding and preparing the platform for scalable marketplace integration.

PT. SICEPAT EKSPRES INDONESIA – Jakarta, Indonesia

Mobile Developer (React Native) | Apr 2022 – Apr 2025

- Refactored the codebase into Clean Architecture, improving maintainability and accelerating development speed for new features.
- Improved app performance through UI optimization and profiling, resulting in faster load times and a smoother user experience for high-volume logistics users.
- Developed and maintained the SiCepat Express App and implemented key integrations such as Midtrans, Xendit, MoEngage, and Insider, enhancing payment reliability and enabling targeted engagement campaigns that increased retention.
- Built the Pick Up App for couriers, streamlining delivery workflows and increasing operational efficiency for field teams.

PINTAR VENTURA GROUP – Jakarta, Indonesia

Mobile Developer (React Native) | Jul 2021 - Mar 2022

- Developed the Posy POS App, optimized for both tablets and mobile devices, delivering a consistent and responsive multi-screen experience.
- Built the Klikoo App for PPOB services using React Native and GraphQL, including API-driven dynamic form rendering that enabled rapid configuration of new services without code changes.
- Improved performance and data efficiency by using GraphQL's flexible queries to fetch only required fields and avoid unnecessary payloads.

PT. MEDIA DATA COMMUNICATION – Jakarta, Indonesia

Mobile Developer (Android & React Native) | Sep 2018 - Jul 2021

- Developed the Meenistry App from scratch in Android Native and later rewrote it in React Native, improving maintainability and significantly accelerating future feature development for this B2B venue management platform.
- Built the Meeva App, enabling users to book meeting rooms, ballrooms, and co-working spaces with improved responsiveness and a smoother reservation experience.
- Implemented CI/CD pipelines using Azure DevOps, automating build and deployment workflows and reducing manual release errors.

JUKIR.CO – Jakarta, Indonesia

Android Developer | Jun 2018 - Sep 2018

- Refactored and stabilized the Jukir App by improving code structure and resolving critical bugs, resulting in a more reliable and maintainable application.
- Developed the Park Go App using Kotlin and Clean Architecture, enabling users to book parking more efficiently and improving overall usability.

PT. CREOACTIVE CIPTA MEDIA – Jakarta, Indonesia

Android Developer | Feb 2018 - Jun 2018

- Developed the Truvel Hotel App, an in-room service platform that replaced traditional phone systems and enabled guests to request F&B, amenities, laundry, transportation, and other hotel services more efficiently.
- Built a customized Android launcher mode to lock down device access, ensuring guests could only interact with the hotel app for a secure and controlled in-room experience.
- Integrated the app with Linphone (VoIP SDK), enabling guests to make direct calls to customer service from within the app and improving the communication flow for hotel operations.

FIRZIL TECH – Surabaya, Indonesia

Android Developer | Sep 2015 - Feb 2018

- Developed multiple Android applications using Java, Kotlin, and the MVP architectural pattern, delivering client projects end-to-end—from implementation to Google Play submission—while ensuring each release met quality and guideline standards.
- Built reusable feature packages and shared components that improved development efficiency across projects and established more consistent architecture within the team.
- Enhanced app performance and reliability through systematic testing, debugging, and performance tuning across diverse client applications.

EDUCATION

POLITEKNIK ELEKTRONIKA NEGERI SURABAYA

Informatics Engineering | 2012 - 2015

SKILLS

- **Languages & Frameworks:** Java, Kotlin, JavaScript, TypeScript, React Native, Android SDK, Flutter
- **Tools & Technologies:** REST API, GraphQL, Git, Azure DevOps, Fastlane, Firebase, CI/CD Pipelines, Unit Testing
- **Specialties:** Payment Integration (Midtrans, Xendit), Marketing SDKs (MoEngage, Insider), VOIP Integration (Linphone), Multi-device Optimization, API Integration
- **Other:** Performance Optimization, App Scalability, Debugging, Profiling, Cross-platform Development, Collaboration & Problem Solving
